PROFESSIONAL EXPERIENCE

Lead Developer & IT Manager

Jan 2017 – Present

GEM-CAR, V2V Technologies Inc.

Montréal, Canada (Remote/Hybrid)

- Team Leadership & Strategy:** Lead a cross-functional agile development team, managing complex multi-tasking projects, defining architecture requirements, and mentoring junior developers to foster a supportive, high-performance environment.
- Release Management & Production Support:** Serve as the primary technical owner responsible for compiling, packaging, and deploying continuous software updates for the legacy GEM-CAR V14 desktop application and the core GEM-LINK integration module.
- System Modernization & Cloud Maintenance:** Spearheaded the architectural migration of GEM-CAR's legacy VB6 monolithic codebase to a modern .NET platform, while actively troubleshooting and resolving critical backend bugs for the new PHP-based GEM-CAR-CLOUD SaaS platform.
- Cloud Data Migration (ETL Tool):** Architected and developed a dedicated migration tool using PHP and Laravel to securely extract, transform, and load client data from legacy local desktop environments (v14) into the cloud, streamlining customer onboarding.
- Hybrid Mobile Innovation:** Packaged and deployed 10 mobile applications using .NET MAUI and native Swift/Xcode (WebView architecture), seamlessly bridging responsive web diagnostic tools into native app environments for technicians' tablets.
- GEM-LINK Integration:** Engineered robust automated solutions integrating 300+ third-party automotive e-commerce sites with the GEM-CAR POS utilizing custom API bridging and Azure Functions.
- Payment & API Solutions:** Developed integrations for major global payment terminals (Desjardins, PAX S80) using C# and WPF, and bypassed strict CORS limitations by building custom JavaScript browser extensions.

Freelance Web Developer

Jan 2014 – Dec 2016

Independent Projects

Casablanca, Morocco

- Partnered directly with clients to gather requirements, design, and develop highly available web and desktop software applications as an independent contractor.
- Successfully managed end-to-end development for 8 major projects, delivering high-quality solutions on-time and on-budget.
- **Alhaj Platform:** Developed and deployed an online reservation system handling high-traffic requests, providing frontend optimization, backend logic modeling, and critical bug resolutions.
